

Hörbar — Testbericht

Test cases, results, and a language review of the meanings and games

Build tested: 2026-09-18 · single file, 774 KB

What was tested	Scale
Vocabulary and phrases	2,194 entries in 60 sets
Grammar exercises	54 topics, 946 questions
Writing tasks	16 tasks with model answers
Speaking topics	13 topics, 34 follow-up questions
Goethe A2 word list	1,214 words, 61 blocks, 1,879 example sentences
Games	8 types, played across all 61 blocks

Result: 14 of 14 automated suites pass. Two content faults were found and fixed during this review. Three remain open and are listed at the end.

1. Walk-through test cases

Written as a person using the app, not as code. Each row is one thing to try and what should happen.

Wörter — audio vocabulary

#	What you do	What should happen	Result
1	Open the app and press Hören	The word is spoken, a pause, then the example sentence	pass
2	Turn on Auto-play and put the phone down	It works through the set unaided and stops at the end	pass
3	Press Slow on a hard word	Same word at a slower rate, same voice	pass
4	Turn on Hide English, then tap Show English	Meaning hidden, then revealed for that card only	pass
5	Tap Suchen and type 'apartment'	Finds die Wohnung, tapping it jumps to the card and speaks it	pass
6	Search 'kase' without the umlaut	Finds der Käse — umlauts accepted either way	pass
7	Search 'termin'	30 hits including phrase sets, ranked with exact matches first	pass
8	Swipe the card left and right	Moves to the next and previous entry	pass

Grammatik

#	What you do	What should happen	Result
1	Open Modalverben	Rule in English first, then the conjugation tables	pass
2	Press Formen mid-question	Tables open over the exercise, close again without losing your place	pass
3	Type a correct answer with no umlaut, e.g. 'groesser'	Accepted	pass
4	Type a wrong answer	Shows the correct answer and explains why	pass
5	Press ► after answering	Speaks the completed sentence	pass
6	Finish a topic	Score out of 19, best score kept on the topic list	pass
7	Type a space inside the answer box	A space is typed; no word is spoken	pass

Schreiben

#	What you do	What should happen	Result
1	Open Termin beim Arzt absagen	Task, checklist, phrase table, then the model letter	pass
2	Press ► on the model	Read aloud in sentence-length runs, not word by word	pass
3	Write your own and press Prüfen	Ticks off each required point and counts words	pass
4	Leave and come back	Your draft is still there	pass
5	Open Formular ausfüllen	A real form with 15 labelled fields, not a blank box	pass

#	What you do	What should happen	Result
6	Enter postcode 813 and press Prüfen	Field flagged: the Swiss postcode has exactly four digits	pass
7	Enter 1.1.1990 as date of birth	Accepted — single digits are valid	pass

Sprechen

#	What you do	What should happen	Result
1	Open Erzählen Sie von sich	Opens in Mit Text üben with the text visible	pass
2	Tap ► on paragraph 3	Only that paragraph is spoken; the button turns amber while speaking	pass
3	Tap the same ► again	Stops immediately	pass
4	Turn Englisch off	Translations hidden, German stays	pass
5	Switch to Ohne Text testen	Text disappears; timer and dictation box remain	pass
6	Choose 5 Min and start	Timer counts down from 5:00 and your voice is recorded	pass
7	Dictate your answer with the keyboard microphone, press Prüfen	Ticks the content points it finds; 7/7 for the full text	pass
8	Press ► Meine Aufnahme	Plays back your own recording	pass
9	Open Rückfragen and hide the answers	34 questions, answers concealed for self-testing	pass
10	Change the voice under Stimme	Sample plays; choice is kept everywhere and after a restart	pass
11	Press Ton stoppen while anything is playing	All audio stops at once	pass
12	Switch tabs while audio is playing	Audio stops by itself	pass

Anki — Goethe A2

#	What you do	What should happen	Result
1	Open the Anki tab	61 blocks of 20, first and last word shown on each	pass
2	Open block 1	20 cards with article, meaning, plural or verb forms, example sentences	pass
3	Tap ► on a word	Speaks the word, then its example sentence	pass
4	Press Alle 20 hören	Plays through all twenty	pass
5	Record yourself reading the block	Saved, playable, and the block is marked in the list	pass
6	Press Üben	Eight games; unsuitable ones greyed out with the reason	pass
7	Play der/die/das in a block with few nouns	That game is disabled rather than showing bad questions	pass
8	Play Memory and mismatch a pair	Both flash amber and turn back over	pass
9	Match a pair in Memory	Turns green and locks; the German card is spoken as it flips	pass
10	Mark blocks as Gelernt, then press Test: alles Gelernte	20 mixed questions drawn only from the marked blocks	pass
11	Press the test with nothing marked	Button is disabled and says to mark a block first	pass

2. Automated suites

These run against the actual file and simulate the screen, so a broken button fails the build.

Suite	What it proves	Result
Tab isolation	Each of the five tabs shows exactly one section	pass
Grammar	All 946 questions answered; scoring, feedback and saving work	pass
Writing	All 16 model answers satisfy their own checklist and word target	pass
Form	15/15 valid entries accepted; 7 invalid ones caught with a reason	pass
Search	German and English both ways; umlauts typed any way	pass
Keyboard	Typing a space never triggers speech	pass
Speaking	All panels render; scoring 7/7, 2/7 and 0/7 as expected	pass
Follow-ups	34 cards, hide/show answers, per-question playback	pass
Voice	German voices only; choice persists; text spoken in 7 runs not 22	pass
Audio stop	Stops on the button and on all five ways of changing view	pass
Recording	Starts, releases the microphone, saves, plays, deletes	pass
Anki tab	61 blocks, last one correctly 14 words, no stray markup	pass
Games	Every word in every mode: 0 malformed questions	pass
Memory	Pairs, mismatch reset, completion, learned-words pool	pass

3. Language review

Checking the German itself, not the software: are the meanings right and do the games teach the right thing?

Articles cross-checked against the Goethe list

Every noun in my own word sets that also appears in the Goethe A2 list was compared. 356 nouns were checkable and 355 agreed. The single disagreement was *der See*, which my checker flagged because the Goethe list holds two separate entries — *der See* (lake) and *die See* (sea) — and my check collapsed them into one. The app's sentence is *Der See ist heute ganz ruhig*, the lake, so the entry is correct and the checker was at fault.

Spelling convention

14,248 German strings I wrote were checked: not one uses *ß*. That is right for Switzerland, where *ss* replaces it. The imported Goethe deck keeps *ß* in 20 headwords such as *außerdem* and *draußen*. This split is deliberate — the deck is quoted as published — but it means you will see both spellings. In the exam in Zurich, write *ss*.

Grammar answer keys

The five hardest topics were read line by line rather than only machine-checked: adjective endings, two-way prepositions, Konjunktiv II, N-declension and relative clauses. All answer keys are correct, including the ones learners most often get wrong: *Ich trinke gern starken Kaffee* (no article, so the adjective carries the ending), *Der Kollege, dem ich geholfen habe* (helfen takes the dative), and *Das ist der Mann, dessen Auto kaputt ist*.

Are the games teaching the right thing?

Game	What it actually trains	Teacher's note
Wort → Bedeutung	Recognition: seeing German, recalling meaning	The easiest direction. Good for a first pass, weakest evidence of real knowledge.
Bedeutung → Wort	Production: recalling the German form	Harder and more useful. Distractors come from the same block, so near-misses are plausible.
Hören	Listening without written support	The closest to the exam's listening section. Worth doing even when it feels hard.
der, die, das	Gender, shown with the plural in the feedback	Correct design: gender and plural are learned together, not separately.
Lückentext	The word inside a real sentence	The most valuable of the six — it tests the word in context and shows the case it takes.
Selbst schreiben	Spelling from memory	Accepts umlauts typed as ae/oe/ue or plain, which is right on a phone keyboard.
Memory	Pairing form with meaning, plus hearing it	Lightest in learning value but good for a tired evening; the German card is spoken as it flips.
Test: alles Gelernte	Mixed recall across everything marked learned	The only one that tests retention over time rather than within a block.

One design limit worth knowing

Multiple choice measures recognition, which always looks better than what you can produce. If a block scores well on *Wort → Bedeutung* but poorly on *Selbst schreiben*, the second score is the honest one. Mark a block as learned only when the typing and listening games go well.

4. Faults found

Everything this review turned up, fixed and unfixed.

#	Fault	Effect on you	Status
1	Noun answers in Grammatik were stored in lower case, so the feedback read "Antwort: herrn" instead of "Herrn".	Graded correctly, but showed wrong German at the moment you were being corrected. 43 answers.	fixed
2	A \$-sequence in my own patch tooling silently corrupted a helper function used by the Lückentext game for bracketed headwords such as Bank (Geldinstitut).	No visible symptom, but the gap game could have mis-handled 8 words. Repaired and now tested directly.	fixed
3	The Goethe deck writes "can not" instead of "cannot" in 37 English sentences.	Cosmetic, in the deck author's English, not the German. Left as published.	open
4	One deck sentence renders "Es war sehr schön" as "It was very beautiful" where "It was very nice" is meant.	Slightly misleading English on one card. The German is correct.	open
5	Browser speech recognition does not work reliably in an embedded browser, and may not work in iOS Safari at all.	You dictate with the keyboard microphone instead, which works everywhere. Recording your own voice needs Safari and a microphone permission.	worked around

Not tested by me: whether recording and speech recognition work on your particular iPhone, and how the Premium voices sound. Those need the real device.
